Management

Plantations

Headquartered in Singapore, KSNR through its various subsidiaries invests in building palm plantations in Indonesia and Malaysia. The company has formed local subsidiaries in these two countries which in turn have partnered with local players to build sustainable and responsible development of palm plantations. Land acquisition is being done with co-operation with the local governments to ensure transparency and fair dealings.

Animal Nutrition & Feed

KSNR is a leading supplier of vegetable oil based Animal Nutrition and Feed Ingredients. It trades in rapeseed oil and soybean oil by-product for animal feed and provides ingredients to mainly aqua, cattle and poultry growers and manufacturers. The parent company has five crushing plants in India where the by-product is manufactured and is shipped for the export market.

Commodity Trading

KSNR is creating value for its parent company, K S Oils in India, by sourcing, buying and transporting edible oil crude from global marketplaces and ensuring lowest price benefits. The company aims to become a leading global agri supply chain player in Asia, servicing the agri-sourcing demands of Indian companies from its world headquarters at Singapore. The company actively trades in edible oil products from leading producing regions like Malaysia, Indonesia, Africa and South America.

Risk Management

KSNR is committed to build a world class financial solutions, investment and risk management business for the group's international agri-trading needs. The company is setting up an active trading desk, staffed with the best international professional talent to ensure commodity led de-risking and best future structures for the company.

Our Strength

- Ability to source crude edible oil from across key global markets
- Cutting-edge focus on R&D
- Global Trading expertise
- Integrated agri-business model

Research & Development

Research and development (R&D) is an integral part of long-term growth and a sustainable view of KSNR's agri-business. KSNR is committed to using scientific methods to effect innovations through the entire agri-supply chain.

Leveraging the strengths of one of most renowned research institutions in the world, the National University of Singapore (NUS), we have partnered with the Minerals, Metals & Materials Technology Centre (M3TC), Faculty of Engineering, NUS for our R&D needs.

Their work incorporates the following key areas:

CSR

KSNR believes that a business is not only responsible for its operations and business results but also for the impact it has on its direct and indirect stakeholders. We engage with customers, suppliers, partners, locals, governments and many other entities while doing business. All of them enable our business in one way or the other. We realize that with the wherewithal we have we can make a positive difference to those around us. For us, Corporate Social Responsibility or Corporate Citizenship is about extending what we do best – creating long-term value.
